

Price Theory I

Problem Set Guidelines

Fall 2018

This document is intended to provide clear guidelines on how the solutions to Price Theory I Problem Sets must be submitted to your TA's. You may contact any of us if something happens to be unclear.

Timing

Problem sets will be given out on Mondays. You must turn in your solutions on Fridays (the same week you get the problem set) in both electronic **and** paper copies.

- The electronic copy must be submitted in **PDF** format on at before 10:30 AM on Friday. **No exceptions** are admitted regarding this deadline.
- The paper copy must be submitted directly to the TA's by the beginning of the TA session, i.e. at 12:30 PM on Friday.

Writing Rules

The solutions you submit **must** be typed. You may use LaTeX or any other text processor, e.g. Microsoft Word. You do not need to provide us with computer plots in your solutions. You may just paste a photo of your handwritten plot in the corresponding section of your typed solution.

Based on our own experience, the vast majority of the homework questions can be appropriately answered in no more than 8 pages (12pt). Therefore, we suggest that you try to keep your solution length below 8 pages per question. However, you may occasionally need to exceed that number of pages. In these cases, you must limit yourself with **up to 10 pages per question (12pt and with standard sized margins), including all figures/plots**. Without exception, any content beyond page 10 will not be graded.

Study Groups

Discussion among students meeting as study groups is strongly encouraged and will lift up the quality of your answers. However, each student must provide his/her own **individual solution** to the Problem Set, **and the submission should list the names of people you discussed the answer with**.
